SOME SIMPLE HTML TO TRY

The following symbols are needed for HTML...
The less than symbol <
The greater than symbol >
The backslash /

Use these keys on the keyboard below for HTML code...
(You will need to hold down shift to use < and >)

ITALICS

You might use italics to emphasise certain words to make them stand out e.g. "I *really* enjoyed reading your post".

You might also like to use italics if you are talking about a title e.g. "I am reading *Cloudy with a Chance of Meatballs*".

To make words italic, use this HTML code around the text...

<i>text</i>

e.g. I <i>love</i> blogging!

The text will look like this...

I *love* blogging!

edublogs

BOLD

You might use bold to make certain words or phrases stand out e.g. "Bloggers should always **proofread** their work".

You might also like to use bold if you want to use sub-headings.

To make text bold, use this HTML code around the text…

text

e.g. I love blogging!

The text will look like this…

I **love** blogging!

LINKS

The code for adding a link (hyperlink) is a bit trickier.

Here is the code…

link word goes here

The URL is the address of the web page.

For example, if I want to link to the Student Challenge blog I would write…

Student Challenge Blog

It would turn out like this…

Student Challenge Blog
